Cal OES COASTAL REGION

Roadway Damage due to Winter Storms, Humboldt County

On 12/19/16 at 1712 hours the California State Warning Center (CSWC) received a Proclamation from Humboldt County declaring a local emergency due to damage to roadways caused by recent storms and flooding. There are approximately 6 roads in the area that have either have sustained damage or are in danger of sustaining damage due to landslides caused by recent winter storms.

- Impacted Roads:
 - Shelter Cove Road
 - This is a main road in the area and has three different sections damaged which reduces the road to one lane.
 - The impacted population is approximately 700 persons and there are no alternate roads for use.
 - There are vacation rentals in the impacted area, however there is no estimate of population for these homes at this time.
 - Humboldt County OES will provide an update for the estimated population of the transient population potentially impacted by these damaged roads.
 - Currently it may take up to 2 hours for law enforcement to respond to emergency calls in this area.
 - The Volunteer Fire Department and EMTs in the area are available with a 5-10 minute response time.
 - · Telegraph Creek Road
 - This road sustained a culvert failure with the potential to release 10,000 cubic yards of sediment into Telegraph Creek.
 - Telegraph Creek is the municipal water supply for the Shelter Cove Subdivision.
 - · Alderpoint Road
 - Steelhead Road
 - Dyerville Loop Road
 - Wilder Ridge Road
- Humboldt County has requested all available recovery assistance from the State and Federal Government.
- Humboldt County OES Emergency Managers are monitoring the situation and will provide updates as they become available.
- Cal OES Coastal Region and the Coastal Duty Officer (CDO) are in contact with Humboldt County OES and will provide updates as they
 become available.

WEATHER OF CONCERN

Weather of Concern

- A relatively weak weather system will bring scattered light showers to portions of Northern California today and this evening impacting the northern mountains and northern Sierra Nevada. A stronger system will be possible Friday into Saturday with the potential for heavier precipitation and strong winds.
- Gusty Santa Ana winds will continue over the Los Angeles and Ventura County mountains and most valleys through this morning.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

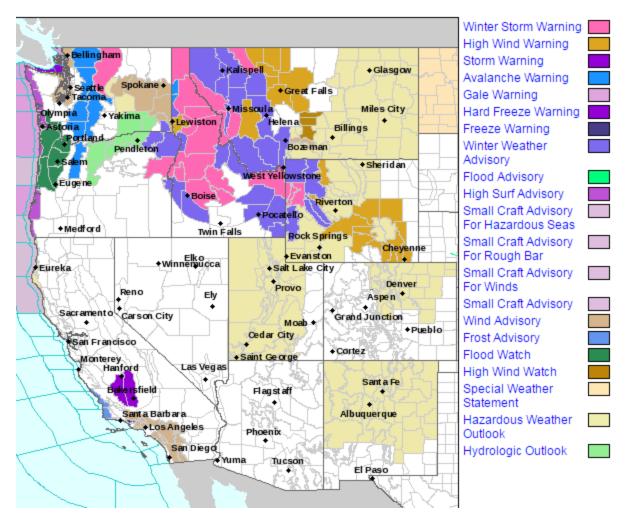

Dry weather will return Wednesday, then it is less certain how strong another system will be, which is expected Thursday evening through Friday. That system will probably see snow levels drop to around 3000 feet in the north and eventually 4000 feet in the south before the precipitation ends. Christmas Eve into early Christmas Day looks mostly dry, but another weather system may arrive late Christmas Day with snow levels remaining seasonable at around 4000 feet in the north and 6000 feet in the south. Moist, cool to cold weather stands a good chance of lingering over the region next Monday. Some gusty north to northeast winds will develop Tuesday night and Wednesday in the areas traditionally favored by that pattern. Trees will continue to be vulnerable to uprooting where the wind speeds become quite strong. Some gusty southerly winds may also develop Thursday night and Friday with the weather system expected those days as well.

SOUTHERN CALIFORNIA

A ridge of high pressure aloft over California will bring a warming trend along with minimum humidity in the single digits and teens away from the San Joaquin Valley and its surrounding foothills through Wednesday. Maximum temperatures will be near normal today with upper 30s and 40s across the mountains, upper 40s and 50s in the valleys of Central California, and upper 50s and 60s in the valleys of Southern California. Temperatures will warm to around 10 degrees above normal by Wednesday, when the warmer valley locations of Southern California will reach the low 80s. An area of low pressure off the Baja Coast will move inland over Northern Baja Thursday bringing cooler temperatures and higher humidity to the region. Scattered showers with light rainfall totals may occur south and east of Los Angeles County. A Pacific trough will bring much cooler temperatures along with possible showers to the entire region Friday through this weekend. This trough will also bring periods of strong south to west winds to the mountains and deserts Friday through this weekend.
